

The Conservation Fund Freshwater Institute and Wyoming Game & Fish Department present

Water Reuse for Intensive Fish Culture

July 9–13, 2007
Dubois, WY USA

COURSE DESCRIPTION

This four-and-a-half day course presented by The Conservation Fund Freshwater Institute and Wyoming Game & Fish Department will cover the fundamentals of design and management of water reuse systems. Staff from the Freshwater Institute (Shepherdstown, WV) will teach the course. The Dubois Fish Hatchery will be the site of lab activities for the course. The Dubois Fish Hatchery is a state-of-the-art fish culture station based on system design concepts covered in the course. The following subjects will be covered:

- Carrying Capacity
- Culture Tank Design
- Solids Control
- Ozonation and UV
- Design Case Studies: Partial Reuse & Fully-Recycle Systems
- Gas Conditioning
- Biofiltration
- Fish Health/Biosecurity
- System Maintenance

LOCATION

Lucius Burch Center – Dennison Lodge
909 W. Ramshorn Street
Dubois, WY 82513 USA

INSTRUCTORS

Steven T. Summerfelt, Ph.D., P.E., Director of Aquaculture Systems Research
